mission

Those diagnosed with thyroid, head and neck cancer may experience a change in voice, speech, swallow function, as well as a hindered quality of life when undergoing treatment. **The THANC (Thyroid, Head & Neck Cancer) Foundation makes research and education for physicians a priority and support more accessible for those undergoing treatment.**

Apart from being a major fundraiser for research in this area—finding new treatments and better therapies—THANC focuses on community awareness and education, as well as patient outreach and support initiatives.

THANC's **Faces of Courage** project and **30 Stories** campaign shine a light on individuals who have shown remarkable courage along their journeys, sharing their stories to comfort and inspire others who can relate to their experiences.

One project in particular embodies THANC's ethos, supporting patients in every part of their journey—the **Thyroid, Head & Neck Cancer Guide**.

The THANC Guide provides patients with **knowledge, hope & support**. Much of the site is a platform to describe the basics of cancer in plain language. While the Journey is a blog that addresses the unique hurdles each person faces on the path back to wellness. Visitors will also find a hub of support options in the guide's exhaustive resources section.
